

## Press Release

### Schneider Electric Saves Valuable Panel Space with Zelio® RSL Slim Interface Relays

**Palatine, Ill. (USA), January 8, 2009** — The Schneider Electric Relay Competency Center provides compact solutions with Zelio® RSL slim interface relays for general purpose relay requirements. At only 6 mm wide, the Zelio RSL frees valuable panel space for OEM panel builders. The Zelio RSL slim interface relay is ideally suited for densely populated automation control panels, assembly machines, packaging equipment, conveyors and food/beverage equipment.

“This is an exciting addition to Schneider Electric’s Zelio relay product offer,” says Terry Harmon, Schneider Electric product manager. “The Zelio RSL is an ideal complement to an already diverse product line. It is just one more way that Schneider Electric meets the needs of distributors and customers by providing complete solutions.”

The Zelio RSL is available as a pre-assembled relay and socket to reduce installation time, but both components also can be obtained individually to seamlessly replace worn out, competitive products. Optional accessories include bus bars and print labels to facilitate parallel wiring and provide quick identification. The relay has a 6A load rating and comes with reinforced printed circuit board (PCB) pins. The universal AC/DC socket has built-in surge protection and an LED indicator and arrives ready for DIN rail mounting. Sockets also are available as screw terminal and spring clamp models.

For more information about Zelio control products from Schneider Electric, call 1-888-778-2733, or visit the Relay Competency Center at [www.serelays.com](http://www.serelays.com) for product selection tools, downloadable 2D and 3D models, and specifications on the entire Zelio relay offer.
